The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5,7-11,13,14,19,20,23-25,38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ouyang et al 10/00 in view of Wieczorek '894.

Ouyang recites all the recitations of claim 1 but does not teach exactly how to enable precise location of the heterojunction and metallurgical junctions. Wieczorek teaches how to enable such structure by practicing "recess" source/drain regions.

Claims 1-5,7-11,13,14,19,20,23-25,38 are prima facie obvious.

Claims 1-5,7-11,13-25,38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ouyang 10/00 with Wieczorek and further in view of Oda '019.

From Oda CMOS implantation would have been obvious for practicing useful circuitry. Claims 15-18,21,22 are obvious structure.

Claims 1-11,13-25,38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ouyang 10/00 with Wieczorek and Oda and further in view of Zhang or Crawford, of record.

Zhang or Crawford suggest 110 crystal orientation for maximum mobility. Claims 6 and 13 are obvious structure.

Claim 39 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ouyang 10/00 with Wieczorek and further in view of Yu '951.

Yu suggests "raised" source/drain regions for minimizing resistance and capacitance. Claim 39 is obvious structure.

As stated previously Zhang or Crawford suggest 100 orientation for maximum mobility.

Applicant's arguments with respect to all the claims have been considered but are moot in view of the new ground(s) of rejection.
